

C2 Multicultural Approaches to Resilience of Urban Areas

Panel discussion

Date: Thursday 27 June 2019

Time: 9:00-10:30

Rooms: S30-32

Language: English

Contact: Albrecht Beck

E-mail/web: office@prepared-international.org

Organized by: ICLEI

OBJECTIVE

During the last decades, cities were characterized by migrant flows that resulted in the grow of multicultural societies and the enlargement of non-native communities. At the same time, cities are increasingly investing in augmenting their adaptation levels to climate change, learning how to co-live with natural disasters, building in places and ways which consider the possibility of disasters happening, developing and approving policies, regulations and plans for resilience enhancement in the short, medium and long run. In this new context, one of the most important things is to involve all the citizens in the new challenging aspects that are rising in these years. When speaking of natural disasters, not being aware, not knowing who to call, how to act, where to look for updated info, is a key reason of exposure to severe risk, and this is particularly true for non-native inhabitants. Cities are made of and by citizens, which need to be seen as key actors to effectively gain results out of policies and investments. It is obvious that a key point to strengthen the resilience of cities is to engage and include as many citizens as possible, but at the same time it shows that in several parts of the world the percentage of citizens engaged, included and aware of emergency management systems is decreasing.

The European Project AMARE-EU is focusing specifically on ***developing concrete, low cost and easy to be applied solutions to involve and engage those who, due to linguistic, social, economic, cultural factors, are at severe risk in case of disaster***. This will, together with developed guidelines and good practices, constitute a **toolkit supporting city administrators** in ensuring most effective involvement of non-native citizens in prevention and preparedness strategies, for creating safer and more resilient communities.

This panel will discuss experiences from several cities and experts on how to best integrate non-native population into resilience building and response preparedness. In addition, it shall provide strategy on how other parts of the world can make use of the project results.

OUTCOMES

Participants will gain a better understanding of:

- Experiences and best practices made by different strategies for the integration of non-native communities into resilience building
- Key problems and existing gaps with the integration of non-native communities in resilience building
- Current status of AMARE-EU project in regard to toolkit development and how cities can use the toolkit

METHODOLOGY

- Facilitator will briefly introduce the topic **(5min)**
- First panelist will introduce the AMARE-EU project and the first results produced **(10min)**
- The following panellists will answer a specific question from the facilitator (see below) to provide an overall picture on the situation in this field of urban resilience building **(each about 5 min)**
- The facilitator will manage questions and answers from the audience. **(25 minutes)**
- The facilitator will conclude with closing remarks. **(5 minutes)**

CONTRIBUTORS

Facilitator *Albrecht A. Beck, Managing Director, Prepared International (PPI), Samerberg, Germany*

Resilience, Urban Response and Inclusion

CV: Albrecht is the Managing Director of Prepared International (PPI) focusing on emergency preparedness and resilience building. Next to this, Albrecht is the Head of the Competence Center for Disaster Risk Diplomacy in Vienna which concentrates on conflict-sensitive Disaster Risk Reduction. In this role, he had been establishing and heading the "Professional Dialogue", the cooperation on life-saving between Israel, Jordan and Palestine. Previously, Albrecht had been leading the field of Mass Evacuations in the International Organization for Migration (IOM) and had been working for UN-OCHA and UN-DPKO. He is a member of the United Nations Disaster Assessment and Coordination Team and been in leading positions in numerous mass disaster responses like Nepal Earthquake and Balkan Floods.

Panelist *Francesca Borgia, Senior Project Manager, EPC srl, Vincenzo, Italy*

Presentation of AMARE-EU Project and the preliminary results

CV: Francesca is a senior project manager and responsible of "European and Funded Projects" departments in EPC srl, she is the coordinator of the European Project AMARE-eu – Adoption of Multicultural Approaches towards Resilience Enhancement in the EU. Graduated in Management Engineering at the Milano Polytechnic University (Italy) in 2000, Francesca has over 15 years of professional experience in projects management, project communication and monitoring of complex and multi-partner projects, mainly funded by national or European funds. In the last five years, she provided support mainly to local and regional authorities, research institutions and other territorial entities in accessing and managing projects in the fields of Civil Protection, Sustainable Development, Urban Mobility, Territorial Cooperation and Environment.

Panelist

Georgios Stratigis, Executive Civil Protection Officer, Municipality of Heraklion, Heraklion, Crete

Why introducing a Multi-cultural approach to Resilience building for Urban Areas?
