sub-national levels

WHY 'FOOD SYSTEMS' ?

Sustainable
Food Systems

Governments at all levels face increasing difficulty in their efforts to achieve sustainable food systems...

Collaborative Framework for Food Systems Transformation

A multi-stakeholder pathway
for sustainable food systems

- **Guide countries, national or subnational level, to apply a food systems approach to their policy making and implementation process leading to long term governance that delivers on livelihood, health/nutrition and environmental outcomes**
- Practical and easy-to-follow actions to perform analyses of food systems, expand or reorient existing activities, integrate policy interventions, and build effective food systems governance;
- Enhance the capacity of governments to deliver sustainable food systems

5 key principles of food systems approach to policy making and implementation:

1: Focus on long-term outcomes

2: Include food consumption as a driver

3: Facilitate platforms of collaboration among food systems actors

4: Address emerging trends and challenges

5: Promote a common narrative and approach across relevant bodies / ministries

Key actions to start food systems transformation:

Be/identify a food systems champions

- Advocate for a food systems approach
- Raise awareness and train food systems actors

holistic assessment of the food system

- Prepare a diagnosis, based on food systems lenses
- Gather data, review policies and institutions mandates

Create a multi-stakeholder platform for action

- Create a joint vision about envisaged sustainable food system
- Create an Action Plan to achieve Sustainable Food Systems (targets, KPIS, responsibilities, etc)

Strengthen institutional capacity

- Empower public institutions;
- Create mandated mechanisms (eg. inter-ministerial committees);
- Continually review and monitor policies

Flexible and to be adapted to local context

Sustainable
Food Systems

Monitoring progress towards the application of food systems approach

Sustainable
Food Systems

Reference checklist for a food systems approach to policy making and implementation

- to be used by countries/cities in order to help them to assess their progress towards the application of a food systems approach to policy making and implementation,
- To support them to monitor achievements towards improved governance of food systems in the medium to long term, based on a food systems approach;
